Summary of Meeting Minutes

In a brief meeting with the State of Washington Department of Ecology, it was decided that a variance was not required for the missing seal interval in Resource Conversation and Recovery Act (RCRA) well 299-E25-1000 which was installed to monitor the Grout Treatment Facility (GTF) in CY 1993. An internal Westinghouse Hanford Nonconformance Report (NCR #050961) will be sufficient documentation and disposition of this incident. The GTF is no longer monitored as a RCRA facility.
